DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2614

4. **Claims 1-8, 10-20, 22-24, 48-59 and 61-64** are rejected under 35 U.S.C. 103(a) as being unpatentable over Finnigan (US 6,650,737 B2) in view of Coffee et al. (US 2006/0182055 A1).

Regarding **claims 1, 13, 48, 49 and 52**, Finnigan discloses a method of processing a telephonic message having network address and voice authentication (column 1, lines 14-18), comprising:

a server storing each of plurality of messages associated with at least two attributes (column 5, lines 41-54); and

a voice controlled unit interactively categorizing the plurality of messages according to the at least two attributes (column 4, lines 48-54).

Finnigan fails to disclose categorizing into overlapping lists of messages as requested by a recipient of the plurality of messages.

However, Coffee teaches categorizing into overlapping lists of messages as requested by a recipient of the plurality of messages and retrieving said messages according to an order requested by the recipient via said voice user interface (paragraphs 0798-0799).

Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to modify the invention of Finnigan using the lists as taught by Coffee.

Art Unit: 2614

This modification of the invention enables the system to categorizing into overlapping lists of messages as requested by a recipient of the plurality of messages so that the user would navigate through received messages.

Regarding **claims 2-8, 10-12, 14-20, 22-24, 44-47, 50, 51, 53-59 and 61-63**, Finnigan discloses a method, wherein the newly-arrived message is presented only if the newly-arrived message is urgent (column 9, lines 23-35).

Allowable Subject Matter

5. **Claims 36-41** are allowed.
6. **Claims 9, 21, 25-29 and 60** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to **claim(s) 1-29 and 44-64** have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2614
